PRESS RELEASE

Upgrading of Hermes Airports' website

It is with great pleasure that we are announcing the upgrading of our website:

www.hermesairports.com

The new website is more users friendly and simpler for anyone requesting information about Cyprus itself and the two international airports.

In collaboration with the Cyprus Tourism Organisation, we are now able to promote Cyprus as a unique tourist destination and provide useful links in particular for business and pleasure activities and also a wide scope of general activities for tourists.

We are also developing interactive communication links with the tourists who can now share with us their videos and photos during their stay in Cyprus. Moreover, we are now promoting a variety of events which will take place at the airport, organised by Hermes and its business associates at the airport.

Last but not least the content of our website is now available in both the Greek and English.

Take a tour and let us know what you think. We would love to get your feedback!
